DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 19 February 2002 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 4-7 are rejected under 35 U.S.C. 102(e) as being anticipated by US 5,979,044 granted to Sumi et al. (hereafter Sumi).

Sumi discloses, referring to figure 4, a printed circuit board comprising: a plurality of spaced apart circuit layers (28, 47, 48); a drill formed blind hole/via (16, see col. 7, lines 25-30) extending between a surface circuit layer and at least one other circuit layer, said blind hole/via having an electrical connect layer which electrically connects said surface circuit layer to said at least one other circuit layer; and a reflow pad (15) for mounting a component (16) to the surface circuit layer, said reflow pad being generally coincident with a surface part of said electrical connect layer [claim 4], wherein the surface part of the blind hole/via electrical connect layer extends a short distance over the surface of the surface circuit layer and wherein the reflow pad is located upon that part of the electrical connect layer that extends over the surface of the circuit layer (see figure 9) [claim 5], wherein the reflow pad extends over the surface part of the blind hole/via electrical connect layer and also extends over a material (16) filling the blind hole/via [claim 6], wherein the material filling the blind hole/via is a pre-preg material remaining in the hole from the manufacturing process of the board [claim 7] (see col. 9, lines 3-10).

Response to Arguments

Applicant's arguments with respect to claims 4-7 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Claim 8 states the limitation "wherein the material filling the blind hole/via is an electro-conductive [claim 8] .

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeremy Norris whose telephone number is 703-306-5737. The examiner can normally be reached on Mon.-Th., 9AM - 6:30 PM and alt. Fri. 9AM-5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David L. Talbott can be reached on 703-305-9883.
